

UV Hygiene Training and Validation

Hand Washing Training

Teach best practise hand washing procedure to reduce the spread of infections

Directions for use:

- Apply 1-2 pumps of UV Glow Lotion to hands and spread evenly over the palms, back of hands and fingers.
- Place hands under UV light and check that hands are glowing uniformly. Spread lotion over any areas that are not glowing.
- Allow lotion to dry, then wash hands thoroughly and re-inspect under UV light.
- Any glowing marks remaining on the hands after washing highlight areas not washed properly.
- Teach best practise hand washing procedure, repeat and look for improvements.
