EDUCATION PRODUCTS

60 GHz Development System

The Pasternack 60 GHz development system provides rapid evaluation of Pasternack's 60 GHz waveguide modules for quick prototyping for millimeter wave wireless system development. This high speed wireless 60 GHz developer kit is created in a partnership between Pasternack and Vubiq (pronounced "View-bik"), an industry expert in designing 60 GHz RF systems. Our 60 GHz wireless development system makes it easy and fast to design new products and applications in the emerging unlicensed millimeter wave ISM V band.

This 60 GHz wireless communications development system facilitates an accelerated design of new high bandwidth products and solutions. This Pasternack 60 GHz development kit utilizes a convenient to use GUI for configuration via USB. A standard WR-15 V-band waveguide antenna interface is incorporated into this millimeter wave system and has a 1.8 GHz modulation bandwidth. 802.11ad and 802.11aj WiFi / WiGig development is supported by the 60 GHz wireless communication system.

60 GHz Development System and Waveguide Modules is a versatile toolkit that allows imagining and designing applications in the readily accessible ISM band. The below list illustrates possible usages of the system and modules:

- High bandwidth data links, supporting multi-gigabit data rates such as gigabit Ethernet data communication
- Wi-Fi, 802.11ad and 802.11aj
- High speed video and audio solutions
- High bandwidth modulation techniques using Quadrature Amplitude Modulation (QAM) and Multiple Input Multiple Output (MIMO)
- High-Definition Serial Digital Interface (HD-SDI) video links
- High resolution radar using Frequency Modulated Continuous Wave (FMCW) modulation
- Building-to-building high speed networks
- High resolution synthetic aperture radar (also using FMCW modulation)
- Remote sensing
- Atmospheric radiometers (receive only) for oxygen and atmospheric research
- Liquid level detection
- Military applications

60 GHz Modules

The 60 GHz transmitter and 60 GHz receiver modules open up ultra high speed, high bandwidth data transmission for widespread use. Pasternack 60 GHz waveguide modules utilizes the globally unlicensed millimeter wave spectrum of 57 GHz to 64 GHz. Our wireless 60 GHz waveguide transmitter and receiver components are ideal for meeting the high speed data transmission needs of companies and developers.

These silicon germanium (SiGe) chip based 60 GHz transceiver modules are lower cost and easier to integrate than existing competing products. Pasternack's 60 GHz V band wireless solution is equally effective at a fraction of the cost and can be connected to any off-the-shelf WR-15 waveguide through the UG-385/U flange. Lower cost, ease of use and ability to attach standard components make these 60 GHz Tx and Rx units practical for a wide range of configurations and budgets.

For typical 60 GHz waveguide module applications please refer to the 60 GHz-Development Section above.

Gain Horn Antennas

Pasternack's high gain WR-15 horn antennas operate between 50 GHz and 70 GHz and are available in 20 dBi, 24 dBi, 34 dBi and 42 dBi gain models. Pasternack's WR-15 waveguide horn antennas pair seamlessly with the recently added 60 GHz transmit/receive development system (PEM003-KIT) which enables companies to experiment and develop applications in the globally-unclassified 60 GHz frequency band. Using two of Pasternack's WR-15 beam antennas rated to 42 dBi gain (PE9881-42), a user is able to transmit and receive a 60 GHz signal at a distance of one kilometer (km), making these antennas an ideal solution for high frequency point-to-point backhaul.

Additionally, Pasternack offers an omni-directional millimeter wave antenna (PE-W15A001), a vertically polarized WR-15 waveguide connected antenna using a standard UG387/U flange that operates between 58 GHz and 63 GHz. This omni-directional millimeter wave antenna has a 30 degree vertical beam width and a 360 degree horizontal gain variation, making it ideal for short range wireless communications, indoor networks, high frequency applications and 60 GHz development systems. The millimeter wave omni-directional antenna is constructed with a durable brass waveguide input and light-weight aluminum body.

The Cable Assembly Locator example above includes Between-Series Cable Assembly part numbers in two configurations: **Connector 1 to Connector 2 as well as Connector 2 to Connector 1 will be found in the same location.**

Products can only be found under the first instance of the series combination. As an example, PE39421-12 above will be found in only one location in the Cable Assembly Section.

All Pasternack coaxial cable assembly part number indicate the length of the assembly (in inches) following the hyphen. Example: PE300-24 and PE300-26.5 are 24 inches and 26.5 inches in length respectively

NOTE: All cable assemblies have a length tolerance of 1.5% or $\pm 3/8"$, whichever is greater.

MIL-DTL-17 Cable Assembly Series

Temperature Conditioned, Low Loss Cable Assembly Series

Pasternack's MIL-DTL-17 Cable Assemblies and Temperature-Conditioned, Low-Loss Cable Assemblies are part of a full line of high-reliability RF components that are in-stock and available for shipment same day. These Commercial-Off-The-Shelf (COTS) assemblies offer a combination of superior materials, processes, and acceptance testing designed to ensure rugged, highly reliable performance for your mission critical applications.

Each assembly is manufactured using J-STD soldering processes and WHMA-A-620 workmanship and is also traceable to its component lots for every material used (RF connectors, coax cable, heat shrink, and solder). There is 100% test sampling of assemblies for connector gaging, insertion loss, VSWR, DWV, workmanship, configuration, and marking, with sampled (AQL) inspections performed for length and mass. A detailed test report accompanies each assembled lot.

Whether the need is to provide a high-reliability MIL-SPEC connection or a rugged, dependable cable assembly, Pasternack has the right assembly for the job. Visit us online at www.pasternack.com to configure and customize your order, or sign up for our mailing list to receive the latest news and product information.

INDEX GUIDE TO COAXIAL CABLES

COAXIAL CABLES.....193

75 OHM BROADCAST.....194

Pasternack's selection of 75 Ohm Broadcast coaxial cable includes RG59-P plenum cable, commercial grade RG6-CATV, HD mini 59 cable in multiple colors as well as PTFE jacketed RG187A/U.

RG MIL-C-17 TYPE CABLE.....196

Pasternack offers 31 different MIL-C-17 compliant coaxial cable types. These cables are available in various diameters, jacket materials, impedances, and velocity factors, providing numerous RF cable options to fit your specific requirements.

COMMUNICATIONS.....194

Our selection of Low Loss cable is designed with high Velocity Factor (VF) dielectric materials and two outer shields for communications applications requiring Low Loss and High Isolation. These cables are offered in several popular sizes including 0.195", 0.240", 0.400", and 0.600" diameters.

SEMIRIGID AND FORMABLE.....197

Pasternack's Precision Cables are designed for RF and Microwave applications with frequencies up to 65 GHz. These cables are constructed of copper jacketed and tinned aluminum semirigid designs; and tinned braid conformable cable in both FEP jacketed and unjacketed designs. The semi rigid and conformable cables are available from 0.020 to 0.250 inches in diameter.

HIGH PERFORMANCE.....195

Pasternack's line of High Performance Flexible Cable has high Velocity Factors of 70 to 85% and incorporate Spiral Wrapped outer conductors for superior shielding under flexure. These cables are used as flexible cable alternatives to semirigid cable and in many cases use the same connectors.

TWINAX.....198

Pasternack offers two versions of Twinax cable with an impedance of 100 or 78 ohms. Twinax cable has two center conductors surrounded by a dielectric. The dielectric is surrounded by a braided outer conductor covered by a PVC jacket material. This construction creates a shielded, twisted pair with superior performance when compared to unshielded, twisted pair cable.

These test cables have excellent electrical properties including low insertion loss, low VSWR and phase stability of +/- 2° to 18 GHz with flexure. Torsion resistant connector heads are directly attached to stainless steel conduit style armoring providing a rugged design for up to 5,000 mating cycles with proper care. The cable armoring enhances amplitude and phase stability by preventing stress due to over bending while maintaining the flexibility required for testing in a lab environment. When used with the appropriate calibration kit these test cables effectively extend the test port of the VNA allowing for accurate measurements of devices that cannot be directly connected to a Network Analyzer test port.

INDEX GUIDE TO WAVEGUIDE PRODUCTS

WAVEGUIDE ANTENNAS.....324

WAVEGUIDE ANTENNAS.....324 | **WG ANTENNA ACCESSORIES.....329**

Pasternack offers a large selection of waveguide antennas from WR-284 to WR-15 (2.6 GHz to 75 GHz) in a variety of flanges and gain. Both UG and CPR/CMR style flanges are available. Most of the gain horn antennas can be purchased already assembled with a waveguide to coax adapter.

WAVEGUIDE BENDS.....332

Pasternack offers a selection of E and H plane waveguide bends of various flanges and interfaces, covering the frequency range from 5.85 GHz to 18 GHz with VSWR as low as 1.08:1.

WAVEGUIDE FILTERS.....332

BANDPASS.....332

Pasternack offers a selection of high performance waveguide bandpass filters, covering the frequency range from 20.2 GHz to 40 GHz with WR-28 and WR-42 interfaces. These filters exhibit excellent out-of-band rejection making them ideally suited to receiver front-end or transmitter applications.

WAVEGUIDE BULKHEAD ADAPTERS.....333

The Pasternack series of rectangular waveguide bulkhead flange mount adapters are mounted to the panel of equipment with screws. Once mounted, waveguides flanges can be attached to the adapter on both sides of the bulkhead adapter to allow a signal path through the panel.

WAVEGUIDE CONVERTERS.....333

MIXER DOWN CONVERTERS.....333 | **MIXER UP CONVERTERS.....334**

Pasternack offers a series of Millimeter Wave Up and Down Converter Mixers that cover popular Ka, Q, U, V, E, and W Bands up to 110 GHz with an IF frequency of DC to 18 GHz. L and R ports support popular waveguide sizes from WR-28 to WR-10, and the IF port utilize Female SMA connectors.

WAVEGUIDE COUPLERS.....334

ASSEMBLIES.....339 | **BROADWALL.....334** | **CROSSGUIDE.....335**

Pasternack offers a brand new family of instrumentation grade directional waveguide couplers boasting accurate performance up to 110 GHz in seven popular frequency bands including K, Ka, Q, U, V, E and W bands. These waveguide couplers boast high directivity of 30 dB typical and insertion loss is as low as 0.6 dB in some models.

WAVEGUIDE DETECTORS.....339

Waveguide detectors consists of 6 unique models covering a broad frequency range of 26.5 GHz to 110 GHz. The input ports use popular waveguide sizes ranging from WR-28 to WR-10, while the video output ports utilize SMA female connectors. The detector circuits use high performance GaAs Schottky Barrier Beam lead diodes with extremely low junction capacitance.

WAVEGUIDE DIRECT READ ATTENUATORS.....340

These continuously variable attenuators have "direct read" capability which allows the user to dial-in the amount of attenuation needed to within 2% accuracy over most of the attenuation range. The attenuation level is stable, highly repeatable and accurate across the full frequency and attenuation range. These attenuators are ideal for precision measurements in demanding applications like instrumentation and system calibration.

WAVEGUIDE ELECTROMECHANICAL RELAY SWITCHES.....340

Pasternack offers a series of 28 waveguide electromechanical relay switch models that offer full waveguide performance covering C, X, Ku, K and Ka frequency bands from 5.85 GHz to 40 GHz. These switches are configured for single-pole double-throw (SPDT) operation with latching self-cut-off actuators, TTL logic and position indicators with manual override.

FLEXIBLE WAVEGUIDES.....341

SEAMLESS.....341

TWISTABLE.....342

This family of flexible, seamless waveguides or flexible, twistable waveguides that can be bent in both the E and H planes without impairing VSWR or attenuation. These waveguides are covered by a neoprene jacket which protect the waveguide and provides mechanical support.

WAVEGUIDE ISOLATORS.....342

Pasternack Enterprises offers a wide variety of waveguide isolators from WR-10 to WR-112. These are two-port devices that transmit microwave or radio frequency power in one direction only and block the signal in the opposite direction.

WAVEGUIDE LOW NOISE AMPLIFIERS.....343

Pasternack Waveguide Low Noise Amplifiers are ruggedly built 50 ohm designs and unconditionally stable with impressive performance across broadband waveguide frequency bands

WAVEGUIDE MAGIC TEES.....343

Pasternack's magic, or hybrid tees are 4 port device that is internally tuned to optimize matching, balance, and isolation. A signal applied to the H port will be equally divided between the two collinear ports. A signal applied to the E port will be divided between the two collinear ports but with a 180 degree phase difference. Similarly, when two in-phase signals of equal amplitude are applied to the collinear ports, these will be added together at the H-plane (sum) port and subtracted from one another at the E-plane (difference) port.

WAVEGUIDE ORTHOMODE TRANSDUCERS.....343

These Orthomode Transducers are used for separating signals into two linear orthogonal signals. The OMT supports circular, elliptical and linear polarized waves. Pasternack's OMT line support from 8.2 to 90 GHz with 30-35 dB of isolation between ports.

WAVEGUIDE PHASE SHIFTERS.....343 WAVEGUIDE TERMINATIONS.....346

These waveguide variable phase shifters are built using low loss dielectric material, which offers minimum insertion loss..

Pasternack has a large family of high performance loads from WR-112 to WR-10. These standard terminations can dissipate up to 300 Watts of power depending on the specific band.

WAVEGUIDE PIN DIODE SWITCHES.....344 WAVEGUIDE TRANSITIONS.....347

Waveguide PIN Diode Switches consist of 4 models that cover 60 GHz to 110 GHz, in both SPST and SPDT configurations.

Pasternack's family of Waveguide Transitions/Adapters are used as a means of propagating RF/Microwave energy from one waveguide size to another.

WAVEGUIDE POLARIZERS.....344 WAVEGUIDE TWISTS.....348

Pasternack's Waveguide Polarizers transform polarized signals from circular to linear and vice versa. They can operate as either right hand or left hand polarization. Waveguide Polarizers currently cover Ku, Ka, and V bands.

Pasternack offers waveguide twists in 45 degree left and right hand waveguide versions as well at 90 degree. These twists are designed and constructed to prevent unwanted distortion to the signal's transmission.

WAVEGUIDE POWER AMPLIFIERS.....344 WAVEGUIDE VARIABLE ATTEN.....348

Waveguide Power Amplifiers consist of 2 models that cover 70.5 GHz to 86.5 GHz (E Band) and support WR-12 waveguide ports. Performance includes small signal gain that ranges from 20 to 22 dB.

The Continuously Variable attenuators are equipped with a micrometer, which enables rapid re-setting. With calibrated charts, attenuators can be used as direct reading attenuator for bench top test set use.

WAVEGUIDE SECTIONS.....345 WAVEGUIDE ACCESSORIES.....348

Pasternack offers a standard product line of waveguide straight section of various length and flanges, covering the frequency range from 5.85 GHz to 12.4 GHz with VSWR as low as 1.03:1.

Pasternack Enterprises offers a variety of waveguide accessories from WR-10 to WR-430.

PASTERNAK ENTERPRISES -- REACH PRODUCT COMPLIANCE PROGRAM

OUR COMMITMENT

At Infinite Electronics, we maintain a comprehensive REACH compliance program to help customers with their green aspirations. We strive to have accurate and available material content data on all of our products. When data is not yet available, customer requests will be given top priority.

WHAT IS REACH?

Regulation (EC) No. 1907/2006 of the European Parliament and of the Council of 18 December 2006 is commonly referred to as REACH (Registration, Evaluation, Authorization, and Restriction of Chemicals). The REACH regulation became effective on June 1, 2007 with the objective to improve protection of human health and the environment from exposure to chemicals. Under REACH, there is an obligation to ensure that articles do not contain any of the substances on the REACH Substances of Very High Concern (SVHCs) Candidate list in concentrations greater than 0.1% by weight. SVHCs are substances that may cause cancer or other serious health or environmental effects and thus face potential restriction or outright bans. The SVHC list is updated with additional substances at approximately every six months, thus product declarations must indicate the applicable SVHC release date.

OUR APPROACH

Infinite Electronics has partnered with Assent Compliance, a world class provider of compliance software and professional support staff, to obtain current material content data on our vast selection of electronic products. Together, we work with our supply chain to routinely collect and analyze this data which enables us to determine the state of compliance for each item we sell. As part of our process integration efforts, we are currently redesigning the way this data can be found on-line so that it is consistent across all brands. Once deployed, we will have a customer self-serve search engine tool to enable real-time creation of part number specific declarations. Until then, customers may request declarations directly from our Assent Compliance partners at InfiniteElectronicsRequests@assentcompliance.com. Please ensure you that you list all Infinite Electronics part numbers within your request.

PASTERNAK ENTERPRISES ROHS COMPLIANCE PROGRAM

Lead-free solder is now available for all cable assemblies upon request or online at www.Pasternack.com.

OUR COMMITMENT

At Infinite Electronics, we maintain a comprehensive RoHS compliance program to help customers with their green aspirations. We strive to have accurate and available material content data on all of our products. When data is not yet available, customer requests will be given top priority.

WHAT IS ROHS?

Short for Directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment, RoHS was adopted in February 2003 by the European Union. Now in its third iteration as (EU) Directive 2015/863, RoHS guidelines and legislation are intended to reduce the presence of ten (10) materials deemed hazardous to the environment. To comply, products entering the EU must not have a homogeneous presence of these materials above the following levels by percentage of their weight:

- Lead (Pb) < 0.1%
- Mercury (Hg) < 0.1%
- Cadmium (Cd) < 0.01%
- DEHP < 0.1%
- DBP < 0.1%
- Hexavalent Chromium (CrVI) < 0.1%
- Polybrominated Biphenyls (PBB) < 0.1%
- Polybrominated Diphenyl Esters (PBDE) < 0.1%
- BBP < 0.1%
- DIBP < 0.1%

You represent to us that you are lawfully able to enter into contracts (e.g., you are not a minor) and that if you are entering into this Agreement for an entity, such as the company you work for, you represent to us that you have the legal authority to bind that entity. Unless otherwise agreed to in writing by seller's authorized agent, any terms and conditions contained in buyer's purchase order or any other document that are different from or in addition to these terms and conditions are objected to, are rejected, and will not be binding on us. By placing an order for products from us, or by accepting delivery of the products described on the applicable packing slip, bill of lading and/or invoice received with the products, you agree to be bound by and accept these terms and conditions of sale.

We may change the terms and conditions of this Agreement in our sole discretion by posting an updated version of these terms and conditions at this location; provided, however, that the terms and condition of this Agreement in effect as of the date of an applicable order shall continue to govern such order and the products purchased thereunder.

2. ORDER ACCEPTANCE

b) We reserve the right, without prior notification, to limit the order quantity on any item and/or refuse service to anyone.

c) All orders are subject to review and acceptance by us. You agree to provide complete and accurate contact information in connection with any order submitted to us. Verification of information may be required prior to the acceptance of any order.

b) Third party product software Licenses are separate end user license agreements ("EULA") and not issued pursuant to the above stated personal license.

c) Buyer agrees to defend, indemnify and hold harmless seller from all damages and third party claims arising from unauthorized use or transfer of the software or firmware.

b) In the case of repairs or overhauls performed pursuant to this Agreement, buyer grants seller a perfected security interest in all products retained in possession of seller upon which any repair or overhaul services have been performed by seller. Buyer further acknowledges and agrees that, in addition to the security interest and lien expressly granted by buyer to seller, seller shall have a lien on the product retained in possession of seller to the extent otherwise provided by law. Buyer acknowledges that the lien (whether granted by buyer or through the operation of law) for repairs or overhaul shall be for the full value of such work, and shall be superior to any lien or interest in favor of buyer, its parents, affiliates, or subsidiaries, or any other person who has knowledge of this Agreement. To the extent that seller maintains possession of product under repair, buyer agrees that seller is a secured creditor of buyer and has all the rights of a secured creditor.

c) With respect to products sold pursuant to this Agreement, buyer agrees and acknowledges that seller shall retain a security interest in such product, unless and until all payment for such products has been made and all other covenants and agreements of this Agreement have been performed in full. Accordingly, buyer agrees that it will not suffer or permit any lien or encumbrance to be established that effects the title to the product sold by seller pursuant hereto until seller has been paid in full. Buyer agrees that, in the event of buyer's insolvency, or in the event that any petition is filed by or against buyer under Chapter 7 or Chapter 11 of the Bankruptcy Code, seller may, at its discretion, recover all products sold pursuant to this Agreement and/or seek damages or costs under applicable laws.
