

Technical Specification

Nitrogen Generator Mico-N2

Flow: 400cc/min
Purity: up to 99.9995%
Pressure: 80 psi
Dewpoint: -40°C/-40°F

Technology: Pressure Swing Adsorption using Carbon Molecular Sieve

N2 Outlet Connection: 1/4"
Air Inlet Connection: 1/4"

Air Requirements: approx. 25l/min @ 8 barg
clean, dry and oil-free

*** Also available with an integrated oil-free compressor as Micro-N2C ***

Dimensions: 225 x 380 x 670 mm/8.8 x 14.9 x 26 in (wxdxh)

Net Weight: 25 kg/55lb
For Micro N2-C 38 kg/84lb

Electrics: 240V/50Hz 120V/60Hz

Ambient Temp: min 0°C max 30°C

dBA Rating: < 45 (Micro-N2C only)

Warranty: Two Years
