Viscol 10 Series Automatic Kinematic Viscometer

Viscosity is defined as the rate of a fluid's internal resistance to the force that is required to flow. Intermolecular force, molecular mass and temperature of a fluid is considered as the three main factors effecting the viscosity. Fluids such as water, air, oil etc. that have directly proportional flow rate with friction resistance are called as Newtonian fluids.

Best method to measure viscosity of Newtonian fluids is by using capillary viscometers. With capillary viscometers, viscosity is determined based on the flow time of a fluid which is kept at a specific temperature inside a capillary with known diameter and length.

Viscol 10 Series, fully-automatic kinematic viscometers, equipped with the latest temperature control, detector, chronometer and washing properties with different models for oil, fuel, bitumen, polymer, paper, food and similar industrial demands. Viscol 10 Series viscometers provide the most reliable results for research, development and quality control practices without any user intervention.

General Specifications

- Adjustable bath temperature between -30°C to 170°C
- Sensitive temperature control (+/- 0.001°C)
- Flow detection sensitivity of 0.001 seconds
- Built-in rapid-cooling unit
- Preheating unit for solid and heavy samples
- Analysis capacity from 0,5 cSt to 25.000 cSt
- Low solvent consumption and waste output
- Fully-automatic sample injection measuring, washing and drying functions
- Built-in single and dual solvent washing function
- Windows-based integrated touch-screen IPC
- USB data transfer
- Leakage and high temperature warning system
- Benchtop, easy-to-operate, ergonomic structure

Viscol 10A Oil & Fuel Viscometer

ASTM D445, ASTM D446, ASTM D2270, ASTM D341, ISO 3104, ISO 3105, IP 71, DIN 51562

Viscol 10A, developed to automatically measure kinematic viscosity of oils and fuels at 40°C and 100°C in a single high precision bath with all necessary components including rapid cooling unit.

Areas of Use

- Mineral and Base Oils
- Used and Waste Oils
- Light and Heavy Fuels
- Crude Oil
- Marine Fuels

Viscosity Measurement Range	0,5 - 25.000 mm²/s (cSt)		
Flow Time Detection Sensitivity	0,001 s		
Temperature Range	Ambient to 130°C		
Temperature Sensitivity	0,001°C		
Sample and Solvent Amount	12 ml sample - 10 ml solvent/test		
Single and Dual Solvent Cleaning	Standard		
User Interface	Touch-Screen Windows IPC		
Operating Conditions	10°C - 35°C		
Dimensions (WxLxH)	300x500x800 mm		
Weight	40 kg		
Power Supply	110 - 240 VAC - 50/60 Hz		

Viscol 10P Plastic/Polymer Viscometer

ASTM D2857, ASTM D789, ASTM D4603, ASTM D1243, ASTM D1795, ASTM D4243, ASTM D871, ISO 1628, ISO 307, ISO 5351, IEC 60450, TAPPI 230

Viscol 10P, developed with acid resistive teflon and glass components for various polymer and plastic applications to measure viscosity values between 10°C - 140°C without any user intervation.

Relative, specific, reduced and intrinsic viscosity values

Areas of Use

- Plastic Applications
- Polymer Applications
- Paper / Cellulose

Technical Specifications			
Viscosity Measurement Range	0,5 - 25.000 mm²/s (cSt)		
Flow Time Detection Sensitivity	0,001 s		
Temperature Range	10°C - 140°C		
Temperature Sensitivity	0,001°C		
Sample and Solvent Amount	12 ml sample - 10 ml solvent/test		
Single and Dual Solvent Cleaning	Standard		
User Interface	Touch-Screen Windows IPC		
Operating Conditions	10°C - 35°C		
Dimensions (WxLxH)	300x500x800 mm		
Weight	40 kg		
Power Supply	110 - 240 VAC - 50/60 Hz		

Viscol 10B Asphalt/Bitumen Viscometer

ASTM D445/D446, ASTM D2170, ISO 3104, ISO 3105, IP 71, DIN 51562

Viscol 10B is suitable for viscosity measurements of heavy samples as asphalt, bitumen and etc. up to 170°C with its integrated and external preheating options.

Viscol 10J Low Temperature Viscometer

ASTM D445, ASTM D446, ISO 3104, ISO 3105,

Viscol 10J is suitable for sensitive viscosity measurements down to -30°C for jet fuels and similar applications.

Special BKS washing and drying system

Areas of use

- Jet fuels
- Transmission oils
- Hydraulic oils

Options

- Preheating unit for intensive and solid samples
- Compressed dry air supplier
- Adjustable bath temperature up to 170°C
- TLC rapid-cooling circulator

Replacement Parts & Consumables

- Multi-fold viscosity tubes
- Certified viscosity reference standards
- Silicon bath oil
- Sample containers PE, glass and metal
- Solvent and waste bottles
