

AGRETO Temperature Probe

Applications:

- Professional measuring instrument for temperature measurement of various bulk materials
- Measures temperature in hay, straw, grain, wood chips, etc.

Technical details:

- Robust construction, high quality materials
- 100/150/200/280 cm long stainless steel probe
- 200 cm and 280 cm detachable version
- Stainless steel probe diameter 16 mm
- Aluminium tip
- 10 mm LCD display
- Temperature sensor in the lance tip
- Temperature range: -50 to +110 °C
- Ongoing display of the measured value
- Power supply: 1 x LR44 battery
- Accuracy +/- 1 °C
- Scope of delivery: temperature probe, battery, manual
- Modern technology "Made in Austria"

Benefits:

- Regular temperature monitoring of your stored goods
- Allows you timely intervention in the temperature development of your stored goods
- Avoid storage losses due to insects and fungi
- Robust instrument for daily use
- Timely detection of fire hazards
- Quick response due to aluminium tip
