Ultra small USB to serial adapter suitable for any environment

The US-159 has 2kV of isolation, protecting from high voltage spikes and ground potential difference. We provide our own software drivers - eliminating many common problems with USB to Serial - giving you a reliable, stable, native com port solution.

2kV Isolation

ESD protection to IEC 61000-4-2:

Contact discharge: ± 8 kV

Air gap discharge: ± 15 kV

"I have tried many off the shelf USB to Serial adapters. Some break easily, others only work some of the time. Brainboxes installed in seconds and could communicate with anything I threw at it, I would recommend this device to anyone."

Colin Young, Nutek Europe

Drivers for all popular operating systems including latest Windows

The high retention USB connection requires a minimum withdrawal requirement of 15N (thats a force of 1.5Kg or 3.4lbs). Connectors have orange color-coded insulator to differentiate from standard USB connectors. The connection is so strong that the port is capable of taking the weight of a bottle of champagne.
