FINE DUST FREE

EN

# Pamares

Particulate Matter Reduction System

## SPECIFICATION

# Pamares

### Features

- Possible fine dust reduction of up to 80%\* inside, approximately 30% in the outside air
- "Plug and Play"
- Easy control with LED indicator
- Long service intervals
- Safe for humans and animals
- Noiseless
- Customized color

### Specifications

- Plastic casing
- Power supply: 230V/110V
- Low power consumption: 18 Watt
- Watertightness classification: IP 65
- Pole-mounting, on lampposts with a diameter of 80 - 200 mm.

### Construction

- Configuration: Cylinder
- Height: 1250 mm
- Diameter: 635 mm
- Weight: 35 kg

### Optional

- Connection with management system.
- Accumulator back-up for energy supply in case of non-continuous power.

### Interface

Smart City ready

\* depending on environmental conditions

StaticAir focuses on the development and production of fine dust reduction systems. Our systems are suitable for indoor and outdoor use and are able to reduce fine dust with a particle size from PM0.1 (ultra fine dust) to PM 10. It is our mission to create a fine dust free living and working environment at the lowest possible costs.
