### 

Capacitive touch solutions for wide range of industrial & commercial applications

1920×1080 resolution

The monitor comes with a 10-point touch screen and 1000nits high brightness screen panel. The interfaces support a wide range of customisation options in addition to the existing types such as HDMI, VGA, AV, etc. Its IP65 front panel design is a great convenience for installation methods and applications.

## **IP65 Rating Screen Panel**

The front panel is designed to carry IP65 degree of protection which offer complete protection against particles, and a good level of protection against water, up to water projected by a nozzle against front panel from any direction.

### Metal Housing

The aluminium case, with its fine workmanship and close fit with the screen, achieves front panel IP65.

### Input Voltage 12-24V

Wide range of input voltages, which is a choice for different application environments

# INDUSTRIAL HNI

### Industrial HMI Applications

Due to increasingly developed world of industrial automation, HMIs are used in a wide range of applications. As the controlling and monitoring core of automated processes, stability, efficiency and environmental adaptability are particularly important. Therefore, it is adapted to different scenarios.
