DIK-6800 Paper Disc Groundwater Velocimeter

- ▶ No special training necessary for use.
- ▶ No electricity is necessary to operate. Lightweight, making it easy to carry.
- ▶ Capable of measuring speeds from 0.03-1.00 cm/min, delivering the same performance of existing calorific ground water flow meters.
- ▶ Measures flow direction and velocity by trailing on discs; easy to understand.
- ▶ Measuring takes a short time; only 60 minutes at the most.
- ▶ Two different frame sizes available: VP50, VP65
- ▶ Suited for depths less than 15 meters.
- ▶ 1/50 the cost of existing velocimeter

Main unit

Comparison of trailing for
0.1 cm/min and 0.7 cm/min velocities.

Ruler for trailing read
