

DIK-5212

Soil Gas Sampler 80cm

Used to collect gas from soil by pushing semi-permeable tip into soil and extracting air sample with syringe. By connecting a gas detector, it is possible to conduct simple gas analysis. Semi-permeable tip can be removed for cleaning.

■ Specifications

Gas sampling part (Sintered filter)

Size : $\phi 13 \times L20\text{mm}$

Material : SUS316L

Pore size : $100 \mu\text{m}$

Tip part (Cone)

Size: $\phi 16 \times L20\text{mm}$ (angle 60°)

Material : SUS304

Sampling depth: Standard 80cm

Option : Syringe 50ml

Enlarged of Tip part
