FEATURES

- Universal 90 - 264VAC or 120 - 373VDC Input voltage
- Operating ambient temperature range: -30°C to +70°C
- High efficiency, high reliability, long service life
- LED indicator for power on
- Output short circuit, over-current, over-voltage protection
- High I/O isolation test voltage up to 3000VAC
- Withstand 5G vibration test
- Operating altitude up to 5000m

LM75-10Dxx series of power converter design features two isolated output versions, which can independently supply two different loads in the system that need to be isolated from each other. The products can be used in harsh working environments with an ambient temperature range from -30°C to +70°C, without the need of a fan for further heat dissipation. In addition, the converters EMC immunity performance meets the requirements of IEC61000 standard and meet emission standard CISPR32/EN55032, class B without any external components, thus providing excellent EMC protection. The products also meet IEC/EN/UL62368, EN60335, GB4943 safety standards. The converters integrate a variety of protection features and offer a high-performance to low-cost ratio providing the best power solution for a variety of industries such as industrial control equipment, instrumentation and smart home and building equipment application.

Note:1.* Working current range: If any one of the 2 outputs arrive at the maximum current, the total output power cannot exceed the rated power and working time < 3s.

2. *Use suffix "Q" for conformal coating.

Product Characteristic Curve

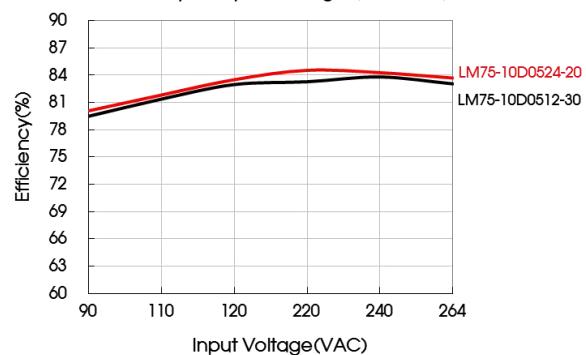

Note: 1. With an input voltage between 90-115VAC and a DC input between 120-160VDC the output power must be derated as per the temperature derating curves;

2. This product is suitable for applications using natural air cooling; for applications in closed environment please consult Mornsun FAE.
