

Keysight Technologies

N9398C/F/G and N9399C/F DC Block

Technical Overview

Introduction

Key Features

- Maximize your operating range - 26.5, 50 or 67 GHz
- Improve calibration accuracy with exceptional return loss >15 dB at 67 GHz
- Maximum available power with < 0.9 dB insertion loss
- 2 choices of DC voltage ratings for a wide range of applications

Description

The Keysight Technologies, Inc. N9398C/F/G and N9399C/F DC blocks offer a new level of DC blocking with broadband performance specified from 50 kHz right up to 67 GHz. Designed to apply AC drive signals to a device while eliminating any DC voltage or current components, these DC blocks feature a broad frequency range, excellent return loss, very low insertion loss and excellent temperature stability. Precision coaxial connector interfaces ensure an excellent impedance match across wide bandwidths, and come in a variety of RF coaxial connector types (3.5 mm, 2.4 mm and 1.85 mm) to meet your application needs.

The Keysight N9398C/F/G and N9399C/F DC blocks are assembled and tested on Keysight precision network analyzers to assure full specifications over their entire frequency range.

Applications

Ruggedness and reliability make these DC blocks suitable for use on the bench and in systems. With low SWR and Insertion loss, they are ideally suited for suppressing DC signals which may affect the accuracy of your microwave and RF measurements or even damage your instruments.

The N9398C/F/G and N9399C/F DC blocks place the capacitance in series with the center conductor, preventing DC signals from flowing along the center conductor which can inadvertently bias other active components. These DC blocks provide good value with excellent broadband performance from 50 kHz to 50 GHz and 700 kHz to 67 GHz at a reasonable cost.

Sample Applications:

1. Amplifier Biasing

Figure 1. Typical application

DC blocks help prevent any DC signals entering the amplifier and creating a DC offset by acting as a high pass filter. A DC block also can be placed in between two RF amplifier stages to prevent any DC signal from the 1st stage entering the next amplifier stage.

2. Surge Arrestor

Figure 2. Typical application

Telecommunications based customers may use the DC blocks as surge arrestors before the incoming coaxial data lines are fed into their systems. Here the DC block protects the receiver circuit from any instantaneous voltage surge by absorbing the excess voltage.

Specifications

Specifications describe the product's warranted performance. Supplemental and typical characteristics are intended to provide typical but non-warranted performance parameters. These are denoted as "typical", "nominal" or "approximate".

Model	N9398C	N9399C	N9398F	N9399F	N9398G
Frequency range	50 kHz to 26.5 GHz	700 kHz to 26.5 GHz	50 kHz to 50 GHz	700 kHz to 50 GHz	700 kHz to 67 GHz
Insertion loss	0.9 dB	1.2 dB	0.9 dB (50 kHz to 26.5 GHz) 1.0 dB (26.5 to 50 GHz)	1.2 dB	0.9 dB (700 kHz to 26.5 GHz) 1.0 dB (26.5 to 67 GHz)
Return loss	10 dB (50 to 300 kHz) 17 dB (300 kHz to 26.5 GHz)	10 dB (700 kHz to 2 MHz) 17 dB (2 MHz to 26.5 GHz)	10 dB (50 to 300 kHz) 15 dB (300 kHz to 50 GHz)	10 dB (700 kHz to 2 MHz) 15 dB (2 MHz to 50 GHz)	10 dB (700 kHz to 2 MHz) 15 dB (2 MHz to 67 GHz)
Rise time	3 ps (typical)	3 ps (typical)	2 ps (typical)	2 ps (typical)	2 ps (typical)
Group delay	118 ps (typical)	118 ps (typical)	78 ps (typical)	78 ps (typical)	76 ps (typical)
Max DC working voltage	16 V	50 V	16 V	50 V	16 V
Connector type	3.5 mm (m-f)	3.5 mm (m-f)	2.4 mm (m-f)	2.4 mm (m-f)	1.85 mm (m-f)
Max RF power*	1 W average	1 W average	1 W average	1 W average	1 W average

* Max peak power = $\frac{\text{Max average power}}{\text{Duty cycle}}$ with condition of pulse width less than 1 μs

Environmental Specifications

The N9398C/F/G and N9399C/F DC blocks are designed to fully comply with Keysight RF network and spectrum analyzers operating within environmental specifications. The following summarizes the environmental specifications for these products.

Temperature

Operating	-25° C to +80° C (N9398C/F/G), -50° C to +100° C (N9399C/F)
Storage	-65° C to +115° C (N9398C/F, N9399C/F), -55° C to +100° C (N9398G)
Cycling	-65° C to +115° C (N9398C/F, N9399C/F), -55° C to +100° C (N9398G), 10 cycles at 20° C per minute, 20 minutes dwell time per MIL-STD-883F, Method 1010.8, Condition C (modified)

Humidity

Operating	50% to 95% RH at 40° C, 24 hour cycling, 5 times
-----------	--

Shock

Half-sine, smoothed	1000 G at 0.5 ms, 3 shock pulses per orientation, 18 total per MIL-STD-883F, Method 2002.4, Condition B (modified)
---------------------	---

Vibration

Broadband random	50 to 2000 Hz, 7.0 G rms, 15 minutes, per MIL-STD-883F, Method 2026-1 (modified)
------------------	---

Altitude

Storage	< 15,300 meters (50,000 feet)
---------	-------------------------------

Mechanical Dimensions

Model	Weight
N9398/9C	0.1 kg (0.22 lbs)
N9398/9F	0.1 kg (0.22 lbs)
N9398G	0.1 kg (0.22 lbs)
