# **HydroStation**

ALL-IN-ONE HYDROLOGICAL MONITORING STATION

### Highlights

- Complete integrated solution for hydrology measurements
- Completely self-sustainable with a battery, a solar panel, and a datalogger with an integrated MPPT battery charger
- Easy integration of third-party hydromet sensors
- Robust modular mechanical design with IP68 enclosure
- Preassembled and easy to install

#### Applications

- Water level monitoring in rivers, channels and lakes
- Early flood warning
- Accurate discharge monitoring in rivers
- Flow tracking in salt and copper mine channels
- Water reservoir monitoring and irrigation control

#### **Product Description**

The Geolux HydroStation is an automated hydrological monitoring station that integrates several Geolux products for tracking hydrology parameters. HydroStation contains a solar panel, a battery, a SmartObserver datalogger with an integrated communication module, and Geolux radar instruments for measurement of water level and surface velocity. Integration of third-party sensors for meteorological measurements, water quantity or air quality and similar instruments is possible and easy to install.

The Geolux HydroView cloud-based software enables continuous real-time monitoring of all measurements and easy remote configuration of all stations and instruments' working parameters.

## **Detailed Specifications**

FCC & CE **APPROVED** 

Power Supply	20 W solar panel
Backup Battery	30 Ah lithium-ion
IP Rating	IP68
Operating Temperature	-20 °C to +70 °C
Installed Instruments	Geolux LX-80 radar level sensor Geolux RSS-2-300W surface velocity radar Geolux HydroCam site monitoring camera
Optional Instruments	Any SDI-12 or Modbus compatible device
Connectivity	GPRS 2G/3G/4G NB-loT Optional LoRaWAN Optional SWARM satellite

MADE IN **EU**
