### Multi-Radio Connectivity with Integrated Sensors

The PCTEL® Wireless Sensor Core (WSC) family is a versatile Industrial IoT product line that offers multiple radio connectivity options including cellular, LoRa, Bluetooth® 5, NFC as well as 802.15.4 support.

In addition to several radios, the PCTEL WSC family includes several sensors to monitor a variety of physical conditions. These sensors can detect gas, air quality, temperature, relative humidity, acceleration, angular rate of change, magnetic field, range, and sound. For solution optimization, the PCTEL WSC can be ordered with a subset of radios and sensors.

With the PCTEL WSC, there is a card edge connector that provides the interfaces for external SPI and I2C devices. Also available on the connector are GPIO pins, an ADC channel, I2S, QSPI and USB. Programming and debugging through a UART and SWD are included as well.
