Chestnut Shell Peeling Machine

GEUSAN / TWOA

Chestnut shell peeling machine

Over 90% of hard shells and skins can be removed within 50 seconds of putting 1 kg of chestnuts into the chestnut shell remover supplied by **Geusan Precision**.

The product is currently installed in many supermart and department stores. It has become the eye-catching spot and marketing point within the stores because consumers can view the removing scene through the transparent case of the product.

Chestnut shell peeler

Good for use at department stores, chestnut farms, traditional markets, discount stores, rice cake makers, restaurants and home.

110/220v power is required. Power generator is also usable.

Advantages of our chestnut shell remover

- 1) Remove the hard shells at once (takes 50 seconds)
- 2) Excellent performance and low rate of failure
- 3) Efficient removal of the skins (90%)
- 4) Convenience in moving (30kgs)
- 5) Stainless steel and materials suitable for food processing machines are used.
- 6) Easy to operate
- 7) Possible to remove outer shells only by using specialized knife
- 8) The best products are made by our own advanced technology and know-how.
- 9) Transparent front part of the apparatus: It has become a crowd-stopper because consumers can view the shell-removing scene.
- 10) Installation of noise blocking device: worried about excessive noise from the machine? It is usable anywhere because it is less noisy.

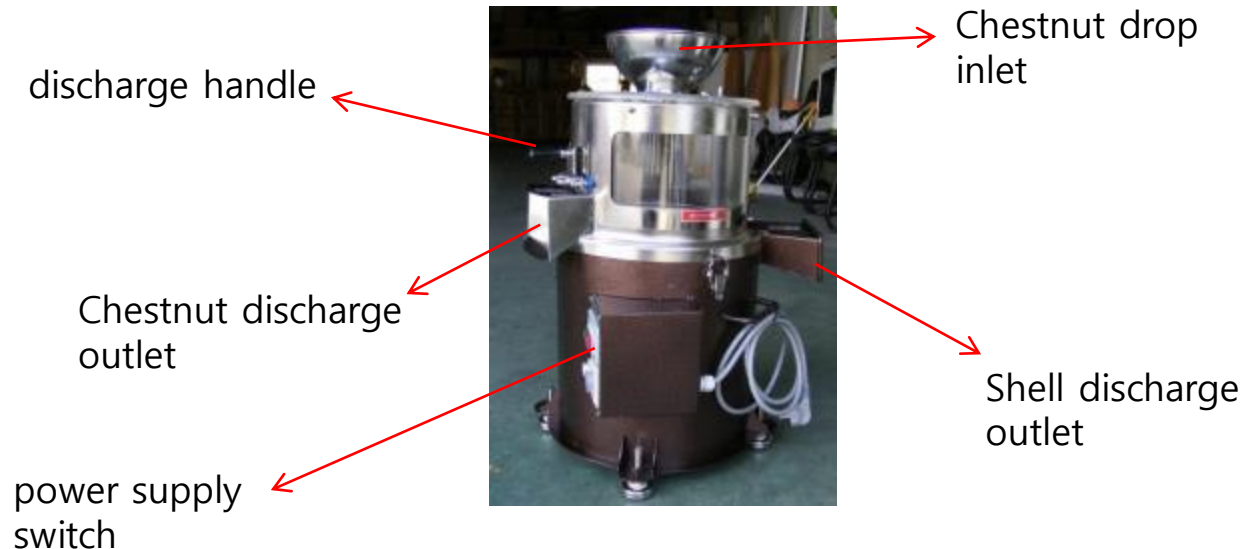

Chestnut shell peeler

Specification

1. Size of machine : 500 * 700
2. Weight : 25kg
3. Power : 110 / 220V (50 / 60Hz)
4. Capacity : 24~36kg / hour
5. Batch size : 1kg

Name Of Parts

Chestnut shell peeler process

Chestnut shell removing process

Put chestnuts → push "on" button to start operating

-> The apparatus is in operation -> you can see the shells being removed and skins being stripped off. -> Stripped shells and skins are removed -> when the automatic alarm goes, -> The light is on -> take out the efficiently processed neat chestnut -> Shell removing and skin stripping process is completed. -> Still remaining skins will have to be removed through the second procedure.
