

OPTICAL DENSITY METER

- ★ Applicable to all kinds of film, can measure the absolute optical density, relative optical density
- ★ Applicable to X-ray film, aluminum film, and other materials optical density measurement, measurement of absolute optical density
- ★ Applicable to all kinds of emulsion, fog, frosted surface material light transmission value; Materials such as patterned or frosted glass ceiling lamp covers

SDR-361T

Optical Density Range	D=0.00-6.00	Aperture Size	Φ2.00mm
Display	3-digit display	Accuracy	±0.02
Sampling Time	0.05S	Power Supply	50 ~ 60Hz、 220V±10%
Power	About 25W	Working Environment	0°C ~ 40°C
