

MULTIFUNCTIONAL FRICTION TESTING MACHINE

The friction testing machine is suitable for all kinds of non-conductor coating layers, all kinds of plastic products oil injection, silk screen surfaces for friction test, such as computers, mobile phones (P.D.A), MP3, CD/VCD/DVD, cordless phone, electronic dictionary, etc., the friction testing machine can also be used as LCD nod fatigue test and handwriting stroke test;

It can use the eraser, artificial sweat, steel velvet, or alcohol friction sample surface to determine the wear resistance of the sample.

SDR-339

Simultaneous Test Sample	2pcs	Testing Load	80-1000g
Maximum Load Bearing	5kg	Move Adjustable Range	2~25mm / 10~50mm
Testing Speed	10~60 times /min(adjustable)	Power Supply	220V / 5A
Size	63*45*37cm(L*W*H)	Weight	About 30kg
