

## Digital Viscometer RV Series

### Feature

The viscometer is a new instrument designed from the circulating viscosity instrument, which has the advanced mechanical design and is controlled by microprocessor. It has the blue high light, bright LCD display can make you see clearly. The user can set the speed or spindle directly by press button and can get all the information about speed, spindle, temperature, viscosity from the display, including the percentage of the result in the whole range, also the RV scan automatically select the spindle and speed by itself.

### Function

The viscometer has high sense, stable result, operating conveniently, beautiful outlook, which is used widely to measure the viscosity of Newton or Un-Newton liquid, such as adhesive solvent, lactop-rene, biological solvent, paint, oil, cosmetic, printing ink and so on.

### Parameter

Test Range:

RV-1S/1T (0.1-100,000 mpa.s)

RV-2M/2T (0.1-2,000,000 mpa.s)

RV-6M/6T (0.1-6,000,000 mpa.s)

Spindle: No. 0, 1, 2, 3, 4

Speed:

RV-1S/1T (6, 12, 30, 60 rpm/min)

RV-2M/2T (0.3, 0.6, 1.5, 6, 12, 30, 60 rpm/min)

RV-6M/6T (0.1 / 0.3 / 0.6 / 1.5 / 3 / 6 / 12 / 30 / 60 rpm/min)

Accuracy: +/-1%

Outline: 370\*325\*280 mm

Net weight: 6.8kg
