

Common and Differential Mode Choke

Characteristics

- Common mode and differential mode choke all in one
- High suppression of common mode and Differential mode noise
- High differential inductance
- Extremely compact design
- Reduces number of components
- Small PCB footprint
- Dielectric rating of 1500VAC
- Operating temperature: -40°C to 125°C
- Designed for UL 1993 US lighting applications

Applications

- LED lighting
- CCFL lighting
- Offline switching power
- Suppression of both common and differential mode noise.
- Filtering on device with unstable ground
- Power line input and output filters
- Power electronics
- Electronic ballasts
- White goods

NOTES:

- (1) The current which causes 20% roll off from the inductance at no DC.
- (2) The heating current which causes a temperature rise of 40°C with no heat sinking.
- (3) Typical DCR is for one coil only; double this for both coils in series.
- (4) Electrical specifications @25°C unless otherwise noted.
