

Gate Drive Transformers - EP7 platform (09-38D series)

Main features

- Excellent performance in small package
- Hi-pot 2500 Vac
- Basic insulation for operating voltages up to 250 Vrms, per IEC61558-2-16 and EN61558-2-16.
- Operating Temperature : -40 to +125°C
- Storage Temperature: -40 to +85°C
- Clearance & Creepage distance: 3mm

Application

- Designed for gate drive application high efficient SMPS
- Suitable for signal and power application
- Synchronous Flyback
