# NI-9222 Getting Started $\pm 10$ V, 500 kS/s/ch, 16-Bit, Simultaneous Input, 4-Channel C Series Voltage Input Module

## Contents

1.	Connector Types . . . . .	3
2.	NI-9222 Block Diagram . . . . .	3
3.	NI-9222 Pinout . . . . .	3
4.	Grounded Connections . . . . .	4
5.	Floating Connections . . . . .	4
6.	NI-9222 Connection Guidelines . . . . .	4
6.1	Wiring for High-Vibration Applications . . . . .	5
7.	Cable Requirements for EMC Compliance . . . . .	5

## Connector Types

The NI-9222 has more than one connector type: NI-9222 with screw terminal, NI-9222 with snap in terminal, and NI-9222 with BNC. Unless the connector type is specified, NI-9222 refers to all connector types.

## NI-9222 Block Diagram

- Input signals on each channel are buffered, conditioned, and then sampled by an ADC.
- Each AI channel provides an independent signal path and ADC, enabling you to sample all channels simultaneously.

## NI-9222 Pinout

**Table 1 :** Signal Descriptions

Signal	Description
AI+	Positive analog input signal connection
AI-	Negative analog input signal connection

## Grounded Connections

Make sure the voltage on the AI+ and AI- connections are in the channel-to-earth safety voltage range to ensure proper operation.

## Floating Connections

## NI-9222 Connection Guidelines

- Make sure that devices you connect to the NI-9222 are compatible with the module specifications.
- You must use 2-wire ferrules to create a secure connection when connecting more than one wire to a single terminal on the NI-9222 with screw terminal and NI-9222 with snap in terminal.

## Wiring for High-Vibration Applications

If your application is subject to high vibration, NI recommends that you use the NI 9971 backshell kit to protect connections to the NI-9222 with screw terminals or NI 9990 backshell kit to protect connections to the NI-9222 with snap in terminals.

You must follow these guidelines to meet the shock and vibration performance specifications stated in the device datasheet on [ni.com/manuals](http://ni.com/manuals).

- Panel mount the system.
- Provide strain relief for the module by securing the cabling to a supporting fixture no more than 8 cm (3 in.) away from the opening of the connector backshell.
- Ensure that the supporting fixture for strain relief is stiff and rigidly coupled to the chassis mounting surface.
- Use ferrules to terminate wires to the detachable connector.

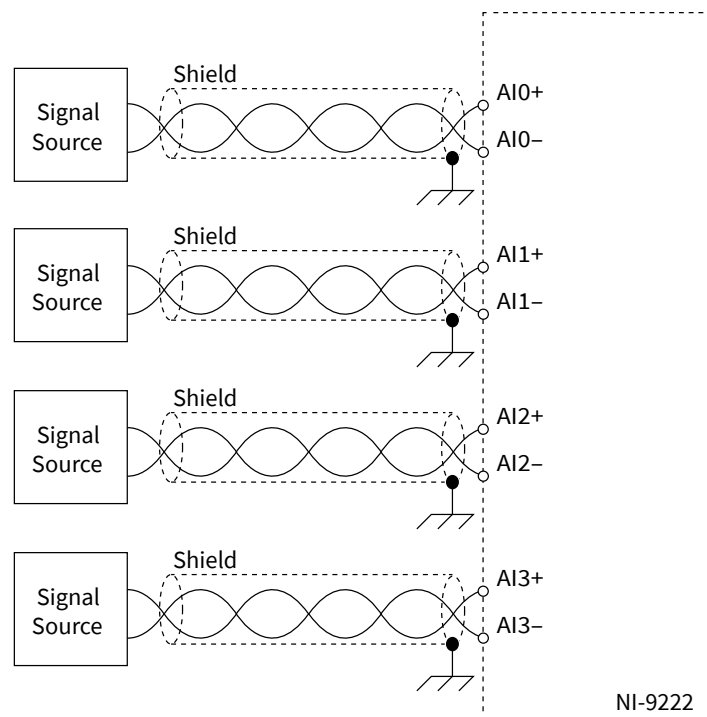

## Cable Requirements for EMC Compliance

Select and install cables for the NI-9222 with screw terminal and NI-9222 with snap in terminal in accordance with the following requirements:

- Connect the cable shield to the chassis ground (grounding screw of the chassis) using the shortest length of wire possible.
- Use shielded, twisted-pair cables (Belden 9451 or equivalent).

**Figure 1 :** Cable Connections for NI-9222 with screw terminal and NI-9222 with snap in terminal for EMC Compliance
