

DDR5 CSODIMM Memory Module

Realize AI in Compact

DDR5 CSODIMM Memory Module

ADATA DDR5 CSODIMM is specifically designed to meet the needs of high-performance computing. It uses high-quality CKD (Clock Driver) components to effectively buffer and stabilize frequency, improving performance and stability. CSODIMM is particularly suitable for big data operations such as AI generation and deep learning. It can also significantly accelerate 3D rendering and animation production, comprehensively improving work efficiency and productivity.

Features

- CKD (Clock Driver) stabilizes performance
- Built-in Power Management IC
- On-Die Error Correcting Code
- Supports Intel® Core™ Ultra 200H/HX Processor

Specifications

- Module: 262-pin DIMM
- Speed: 6,400 MT/s
- Capacity: 16GB
- CAS Latencies: 52-52-52
- Operating Voltage: VDD = 1.1V
- Operating Temperature: 0°C - 95°C TC
- Warranty: Limited Lifetime Warranty

Model Number and EAN Code
