

Oil Filter

The OZ-SEPA™ filter stands as one of the few technologies capable of processing large volumes of oil-contaminated water, offering a unique solution to the environmental and water scarcity challenges faced by industries around the world.

SPECIFICATIONS

Material : textile, plastic, iron mesh

Dimensions : 1m² unit (width 1.1m X length up to 1,000m)

Durability : Over 1000 times reusability for scoopers

USE

- Allows direct oil separation
- 99.9% Separation for reuse
- Excellent Separation for Low Sulfur Oil
- Eco friendly separation without secondary pollution
- Oil wipes, face masks, diapers etc.
- Industrial oil separation including shale oil wastewater treatment, microplastic retrieval, sewage treatment and soil remediation
