

Data Sheet

BCP- CO₂

Advantages

- > robust and multi-functional
- > low maintenance
- > favourably priced
- > independent of the gas flow
- > measuring directly on the spot, where the process takes place (in-situ)
- > no extra gas lines or gas coolers needed
- > high reliability by use of parallel systems
- > connectable to all standard fixing systems
- > standardized data transfer
- > real time process optimization
- > aluminum housing on demand available with display

Application areas

- > pharmaceutical industry
- > biogas plants
- > fermentation processes
- > laboratory
- > large industrial plants
- > (parallel) bioreactors
- > connection to disposables, and lots more....

**Sensor BCP-CO₂ for
in-situ measuring**

BlueSens.com

Data Sheet

BCP- CO₂

<i>Sensor</i>	BCP- CO₂	
<i>Principle</i>	Infrared, dual wavelength	
<i>Measuring range</i>	0-10 Vol.%, 0-25 Vol.% 0-50 Vol.*%	
<i>Drift</i>	< ± 2% value / year	
<i>Accuracy</i>	<0,2% FS** ± 3% value	
<i>Housing</i>	Aluminium (IP65), PA	
<i>Dimension/Weight</i>	100x100x130 mm WxDxH/750g (Aluminium) 80x130mm DxH/150g (PA)	
<i>Mechanical connector</i>	G 1¼", GL 45, Tri-Clamp SMS38, hose connection 4-12 mm etc.	
<i>Operating temperature</i>	Temperature difference max. 25°C (45 °F) e.g. 15 - 40 °C (59 - 104°F)	
<i>Storage temperature</i>	0 °C - +60 °C	32 °F - 140 °F
	< 75% RF non-condensing	
<i>Pressure range</i>	0.8 - 1.3 bar	11.6 - 18.85 psi
<i>Lifetime of optical components</i>	approx. 3 years	
<i>Power Supply</i>	12 oder 24 VDC, 1A	
<i>Output</i>	RS 232, RS 485, 4-20 mA, USB, Ethernet	

*others on request ** full scale
