

Sm.OIL Oil/Water Interface Meter

Lengths: 60ft or 20m Warranty: 3 years, probe 1 year

The Sm.OIL oil/water interface meter has the same functionality of our H.OIL oil/water interface meter. This compact unit only comes in one tape length (20m or 60') on a small hand held frame designed for easy portability.

The Sm.OIL is used to measure the interface level between two liquids in the same tank, vessel, well or aquifer. The dissimilar density of two liquids means the lower density, non-conductive product (LNAPL) will float on top of the higher density, conductive liquid (water). Denser products will tend to sink (DNAPL), creating a layer under the water.

The hydrocarbon resistant **Kynar** jacketed, high tensile steel core tape is able to withstand hydrocarbons, solvents and other harsh contaminants. The **CSA intrinsically safe certification** makes the **Sm.OIL** ideal for use in hazardous environments by Oil & Gas, Chemical and Petrochemical Industries.

Features included with the Sm.OIL:

- Certified Intrinsically safe to CSA and ANSI/UL standards, class 9098-1 or 9098-81 (USA) for hazardous locations and Class I groups A,B,C and D
- Detects LNAPL and DNAPL
- Measures product layer as thin as 1mm (1/200')
- Ground Lead
- Electronic Module (IP65) Automatic shut off after 10 minutes, removable for easy cleaning and servicing
- Probe (IP68) fully pressure/depth rated, 19mm (3/4") field replaceable
- Steel Tape high tensile steel, jacketed with Kynar, high break strength, stretch resistant and lifelong legibility – markings in metric (mm) or engineering scale (1/100')
- Padded Carry Case to protect your precision oil/water interface meter from the elements
- Hanger to support the meter at the well head
- Handle soft comfort foam grip
- Winding Handle custom made for easy rewinding with gloved hands

Available Accessories:

Sm.OIL Support Kit
