

Dew Point Meter NOVOTEST KTR-1

Dew Point Meter NOVOTEST KTR-1 is designed for rapid testing of air temperature and humidity, dew point calculation and surface temperature measurement by contact method.

Dew point meter measures: relative humidity, air temperature (-20 to +125°C), the surface temperature (-20 to +125°C).

And calculates: dew point, the difference between the dew point and the temperature of the surface.
