

RÉFRACTOMÈTRE PROCESS : CM-800-ALPHA-NMP

Note d'Application

User : NMP retrieve company or lithium ion battery factory or system engineering company for NMP.

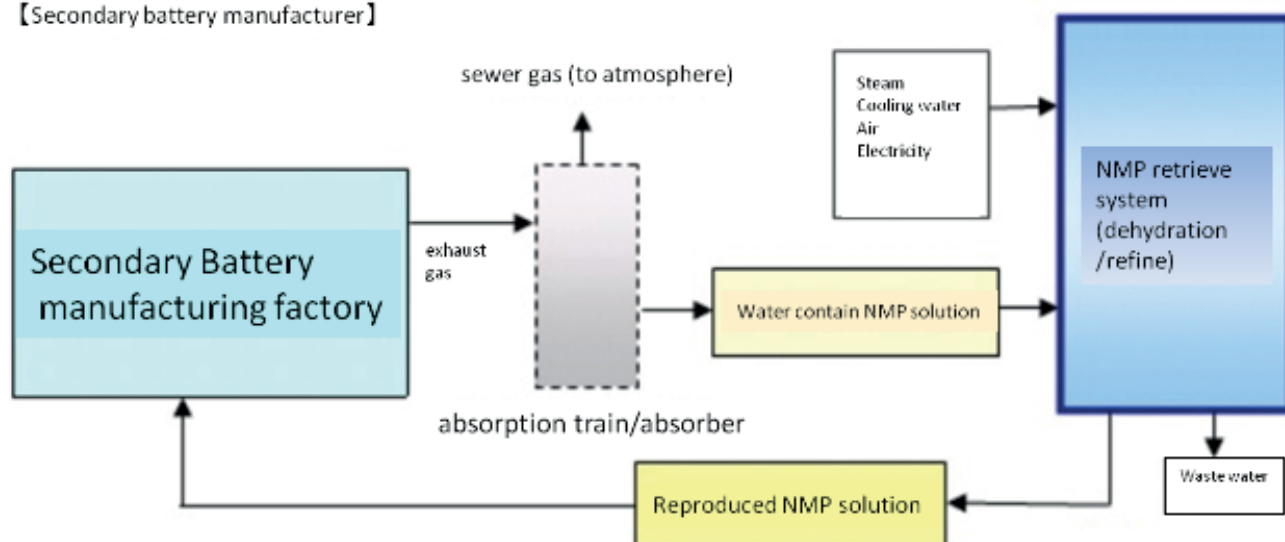

Application : Lithium ion battery company has system to retrieve NMP, to build inline in retrieve system.

Purpose of using inline: To recycle and to reuse NMP, there is advantage to retrieve NMP for cost cutting. Plus, there is environmental advantage too.

NMP retrieve system detail : (From retrieve system company)

【Secondary battery manufacturer】

Installation point: Some measure NMP before they do concentration NMP solution (as you know NMP&water), but most of them install at piping outlet after dehydration refining of rectification tower. (Blue section in above picture.)

Thus, there could be at least 1 point of installing inline, also possibility of installing 3 units, Pink section and waste water section!

Generally, NMP % goes up to 80%, but it is better that scale has to be 100%.
For your info : NMP% 100%=Brix about 72%.

This lithium ion battery could be used for EV car.
